PROJECTS

Cash-Flow: ATM Replenishment Strategy
A data-driven system to predict ATM cash requirements using ML-based time series forecasting. Analyzes historical withdrawal data with Facebook Prophet to estimate 7-day cash demand, calculates replenishment needs with a safety buffer, and lets bank operators adjust ATM capacity and buffer parameters — all through a Streamlit interface.

Personal Portfolio Website
Designed and developed an responsive portfolio using HTML, CSS, and JavaScript — showcasing skills, certifications, and projects with a clean, modern UI.

AI Chatbot Application
Built a functional chatbot using IBM SkillsBuild resources. Designed conversational flows, integrated NLP concepts, and deployed an interactive interface for real-time user Q&A.

Context-Aware Micro-Debate Generator
Built a Context-Aware Micro-Debate Generator using Python Flask, HTML, and CSS to generate structured pro and con arguments for educational and debate practice purposes.
